**UIC Tribal Consultation Meeting with the Seneca Nation:** On April 20, DWMIB and SPO participated in a consultation meeting with the Seneca Nation of Indians and the Region 3 UIC permitting program concerning the proposed Catalyst Energy Injection well UIC permit in Pennsylvania. This meeting was the latest in a series as part of an ongoing consultation among the Seneca Nation, Region 2, and Region 3. The consultation focuses on activities upstream of Seneca Nation territories and on ancestral lands that have a potential to impact the Nation's water resources. The Seneca Nation was appreciative that Region 3 alerted them of this permit in advance of the public comment period. They plan to submit detailed comments when the public comment period opens.
